	Yes	No
Do you or have you had a history of migraine headaches?	☒	☐
Do you or have you had a history of claustrophobia?	☐	☒
Do you or have you had a history of frequent or severe motion sickness?	☐	☒
Do you or have you had a history of any health problems (e.g., seizures, diabetes, heart problems, vertigo) that affect your ability to drive?	☐	☒
If you are a female, are you or is there a possibility that you might be pregnant?	☐	☒

Demographics

1. What is your race/ethnicity?	☒ White / Caucasian
2. What is your gender?	☒ Female
3. How old are you?	38
4. What is the highest level of education you have completed?	☒ Some college/Associates/Technical school training
5. Which option best describes your current home?	☒ I have no permanent residence.
6. How do you pay for healthcare?	☒ Private insurance
8. Which best corresponds to your current work situation?	☒ Not working or looking for work.
9. What is your combined family income for the past 12 months (from all sources)	☒ \$5,000-\$19,999

Exit Interview

1. Which option describes your current home?	☒ I have no permanent residence
2. How do you pay for healthcare?	☒ Private insurance
3. Which best corresponds to your current work situation?	☒ Not working or looking for work.
1. You experienced Cognitive Behavioral Therapy and Heart Rate Variance interventions in virtual, augmented, and mixed realities. How would you describe your experiences with each of those headsets?	augmented reality was the least liked and virtual reality was the most liked. neutral about mixed reality. liked virtual reality because pt could feel that they could focus more on the interventions and themselves. felt like all headsets were easy to navigate, but pretty touch sensitive. rates AR 5/10, MR 7/10, and VR 9/10.
2. Do you think these types of technologies have a place in OUD treatment and management? If YES, how? If NO, why not?	somewhat, yes. the tech helped a little, but it was nice to have the interventions to be somewhere and have some sense of escape from reality and that is what individuals with OUD may need incorporated into treatment.
3. How would you describe the iPAL application, in terms of a cravings management tool?	helps a little, gives someone something to focus on other than using substances. sometimes it's helpful to be by yourself and not talk to anyone and focus on yourself and what interventions you may need.
4. How would you describe the interventions (CBT, HRV)? Were the interventions appropriate for the intensity level and triggers you reported?	CBT - did not enjoy. did not feel like the videos felt real or genuine. HRV: really did enjoy. and allowed pt to escape. thinks that if people had a minute to just focus on themselves entirely and breathe, then they may be able to stop thinking about using or actually using drugs. felt like CBT was not appropriate for triggers nor helpful, but felt like HRV was significantly helpful for her.
5. Do you think the iPAL app, or similar digital interventions delivered via phone should be integrated into OUD treatment plans? If YES, how and in what capacity or role? if NO, why not?	yes. it helps by giving individuals something to do and put their thoughts down and delve deeper into them. it is helpful to focus without being around people. pt states that they are not a people person.
6. If iPAL or a similar app was available, would you download the app and incorporate it into your OUD treatment and management plan?	yes. would utilize one to two times per day.
