	Yes	No
Do you or have you had a history of migraine headaches?	☐	☒
Do you or have you had a history of claustrophobia?	☐	☒
Do you or have you had a history of frequent or severe motion sickness?	☐	☒
Do you or have you had a history of any health problems (e.g., seizures, diabetes, heart problems, vertigo) that affect your ability to drive?	☐	☒
If you are a female, are you or is there a possibility that you might be pregnant?	☐	☒

Demographics

1. What is your race/ethnicity?	☒ White / Caucasian
2. What is your gender?	☒ Male
3. How old are you?	42
4. What is the highest level of education you have completed?	☒ Some college/Associates/Technical school training
5. Which option best describes your current home?	☒ It is owned or being bought by you or someone in household.
6. How do you pay for healthcare?	☒ Government funding (Medicaid, Medicare, Ryan White, VA)
8. Which best corresponds to your current work situation?	☒ Working part time.
9. What is your combined family income for the past 12 months (from all sources)	☒ \$50,000- \$99,999

Exit Interview

1. Which option describes your current home?	☒ It is owned or being bought by you or someone in household
2. How do you pay for healthcare?	☒ Self-pay, out of pocket
3. Which best corresponds to your current work situation?	☒ Working part time.
1. You experienced Cognitive Behavioral Therapy and Heart Rate Variance interventions in virtual, augmented, and mixed realities. How would you describe your experiences with each of those headsets?	VR was the favorite, had a lot of fun with virtual reality. felt like i could concentrate more because i couldn't see the surroundings, 10/10. AR was more cumbersome and not as comfortable nor immersive and was more distracting, 5/10. MR was a slight step up from AR and i felt neutral 6.5/10
2. Do you think these types of technologies have a place in OUD treatment and management? If YES, how? If NO, why not?	absolutely, 100%. based on own experiences, i feel like meditation is incredibly important to creating new neuropathways and changing behaviors in general. could see all of technologies being effective as long as you're in the right headspace.
3. How would you describe the iPAL application, in terms of a cravings management tool?	application was easy to use, pretty straight forward and effective. felt like the answers correlated well with the videos and exercises.
4. How would you describe the interventions (CBT, HRV)? Were the interventions appropriate for the intensity level and triggers you reported?	yes, i found the videos to be helpful. the little reminders can be helpful sometimes, specifically with one of the loneliness videos. the breathing exercises were helpful and allowed me to take a minute to get grounded.
5. Do you think the iPAL app, or similar digital interventions delivered via phone should be integrated into OUD treatment plans? If YES, how and in what capacity or role? if NO, why not?	i don't see why not, yes. i think that it has the potential to help individuals with OUD and any intervention or tool that could benefit someone should be utilized. it would be good in teaching people how to breathe, meditate, and cope since they may not know
6. If iPAL or a similar app was available, would you download the app and incorporate it into your OUD treatment and management plan?	yes. would utilize once a day to manage cravings.
