Participant	016
	Yes No
Do you or have you had a history of migraine headaches?	☐ ☒
Do you or have you had a history of claustrophobia?	☐ ☒
Do you or have you had a history of frequent or severe motion sickness?	☐ ☒
Do you or have you had a history of any health problems (e.g., seizures, diabetes, heart problems, vertigo) that affect your ability to drive?	☐ ☒
If you are a female, are you or is there a possibility that you might be pregnant?	☐ ☒

Demographics

1. What is your race/ethnicity?	☒ White / Caucasian
2. What is your gender?	☒ Male
3. How old are you?	49
4. What is the highest level of education you have completed?	☒ 12th grade or less
5. Which option best describes your current home?	☒ It is rented for money by you or someone in household.
6. How do you pay for healthcare?	☒ Self-pay, out of pocket
8. Which best corresponds to your current work situation?	☒ Working part time.
9. What is your combined family income for the past 12 months (from all sources)	☒ \$5,000-\$19,999

Exit Interview

1. Which option describes your current home?	☒ It is rented for money by you or someone in household
2. How do you pay for healthcare?	☒ Self-pay, out of pocket
3. Which best corresponds to your current work situation?	☒ Not working or looking for work.
1. You experienced Cognitive Behavioral Therapy and Heart Rate Variance interventions in virtual, augmented, and mixed realities. How would you describe your experiences with each of those headsets?	participant notes that he enjoyed his experiences with all of the headsets, but enjoyed VR the most. enjoyed undergoing the interventions in all three of them.
2. Do you think these types of technologies have a place in OUD treatment and management? If YES, how? If NO, why not?	yes, especially for those who prefer listening to someone speaking as opposed to going to an actual counselor and speaking with them. there is also the convenience of potentially using these technologies at home with the iPAL app, but participant is unsure of how this could potentially be executed.
3. How would you describe the iPAL application, in terms of a cravings management tool?	believes that the app was great and easy to use and navigate and believes that it asked appropriate questions.
4. How would you describe the interventions (CBT, HRV)? Were the interventions appropriate for the intensity level and triggers you reported?	CBT - believes that the videos were "alright." felt like they were appropriate for the intensity level and triggers reported. does not believe that they were too long or too short. believes the breathing exercises were appropriate for the triggers reported, but believes that they were too long, but may be beneficial and a good length for other patients.
5. Do you think the iPAL app, or similar digital interventions delivered via phone should be integrated into OUD treatment plans? If YES, how and in what capacity or role? if NO, why not?	yes, but believes it would be most beneficial to use with the headsets as opposed to independently.
6. If iPAL or a similar app was available, would you download the app and incorporate it into your OUD treatment and management plan?	yes - could envision self utilizing once per week, but would use daily if headsets were available.
