| 1. You experienced Cognitive Behavioral Therapy and Heart Rate Variance interventions in virtual, augmented, and mixed realities. How would you describe your experiences with each of those headsets? | believes that all of the realities were all easy to navigate and very relaxing to use. enjoyed the virtual reality the most due to how realistic it seems and how time slipped away during usage.                                                                                                                                    |
| 2. Do you think these types of technologies have a place in OUD treatment and management?<br>If YES, how?<br>If NO, why not?                                                                           | yes - believes that if someone is experiencing cravings, then these technologies could assist with putting them in a different state of mind and help as a preventative method of treatment.                                                                                                                                         |
| 3. How would you describe the iPAL application, in terms of a cravings management tool?                                                                                                                | enjoyed using the app, believes that it is very straightforward and easy to use. notes that a good amount of questions were asked and good questions were asked as well. no suggestions reported.                                                                                                                                    |
| 4. How would you describe the interventions (CBT, HRV)?<br>Were the interventions appropriate for the intensity level and triggers you reported?                                                       | believes that CBT videos were very helpful. felt like they hit on the right points and did not believe that they were either too long or too short. also believes that HRV was very helpful as well and also a good length of time. believes that both interventions were appropriate for the intensity level and triggers reported. |
| 5. Do you think the iPAL app, or similar digital interventions delivered via phone should be integrated into OUD treatment plans?<br>If YES, how and in what capacity or role?<br>if NO, why not?      | yes, believes that just like the virtual, augmented, and mixed reality interventions, the app could help provide interventions through the phone that could assist with putting someone in a different state of mind when struggling with feelings of cravings.                                                                      |
| 6. If iPAL or a similar app was available, would you download the app and incorporate it into your OUD treatment and management plan?                                                                  | yes, reports that would use the app once a week                                                                                                                                                                                                                                                                                      |
