Participant	013
	Yes No
Do you or have you had a history of migraine headaches?	☐ ☒
Do you or have you had a history of claustrophobia?	☒ ☐
Do you or have you had a history of frequent or severe motion sickness?	☐ ☒
Do you or have you had a history of any health problems (e.g., seizures, diabetes, heart problems, vertigo) that affect your ability to drive?	☐ ☒
If you are a female, are you or is there a possibility that you might be pregnant?	☐ ☒

Demographics

1. What is your race/ethnicity?	☒ White / Caucasian
2. What is your gender?	☒ Female
3. How old are you?	33
4. What is the highest level of education you have completed?	☒ 12th grade or less
5. Which option best describes your current home?	☒ I have no permanent residence.
6. How do you pay for healthcare?	☒ Private insurance
8. Which best corresponds to your current work situation?	☒ Working part time.
9. What is your combined family income for the past 12 months (from all sources)	☒ \$5,000-\$19,999

Exit Interview

1. Which option describes your current home?	☒ It is rented for money by you or someone in household
2. How do you pay for healthcare?	☒ Self-pay, out of pocket
3. Which best corresponds to your current work situation?	☒ Not working or looking for work.
1. You experienced Cognitive Behavioral Therapy and Heart Rate Variance interventions in virtual, augmented, and mixed realities. How would you describe your experiences with each of those headsets?	VR was the best one. Was able to get a real feel to it because it blocked everything out. Did not enjoy AR or MR much because could still see external environment.
2. Do you think these types of technologies have a place in OUD treatment and management? If YES, how? If NO, why not?	Yes, with the VR for sure. Could see it helping someone since it blocks everything around you and gets your full attention.
3. How would you describe the iPAL application, in terms of a cravings management tool?	It's good at getting a feel of what's going on. It could be better as far as giving more interventions and exercises to go with it.
4. How would you describe the interventions (CBT, HRV)? Were the interventions appropriate for the intensity level and triggers you reported?	CBT: Feels like the woman in the videos hit on almost every point, but could have gone a little more in depth with the subjects that she was discussing. HRV - did help participant. Believes that these interventions were appropriate for the intensity level and triggers reported.
5. Do you think the iPAL app, or similar digital interventions delivered via phone should be integrated into OUD treatment plans? If YES, how and in what capacity or role? if NO, why not?	Yes - could see the iPAL helping, specifically with assisting with understanding and navigating one's feelings.
6. If iPAL or a similar app was available, would you download the app and incorporate it into your OUD treatment and management plan?	Yes - could envision self using the application pretty frequently (4-5x per week)
